☒ Send me occasional product updates, announcements, and offers.

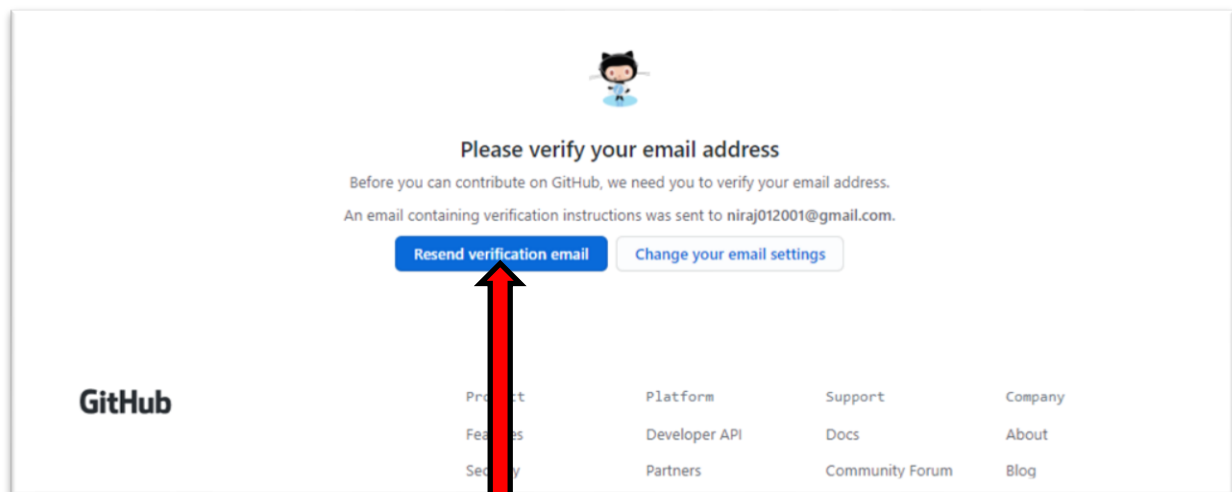

Verify your account

✓

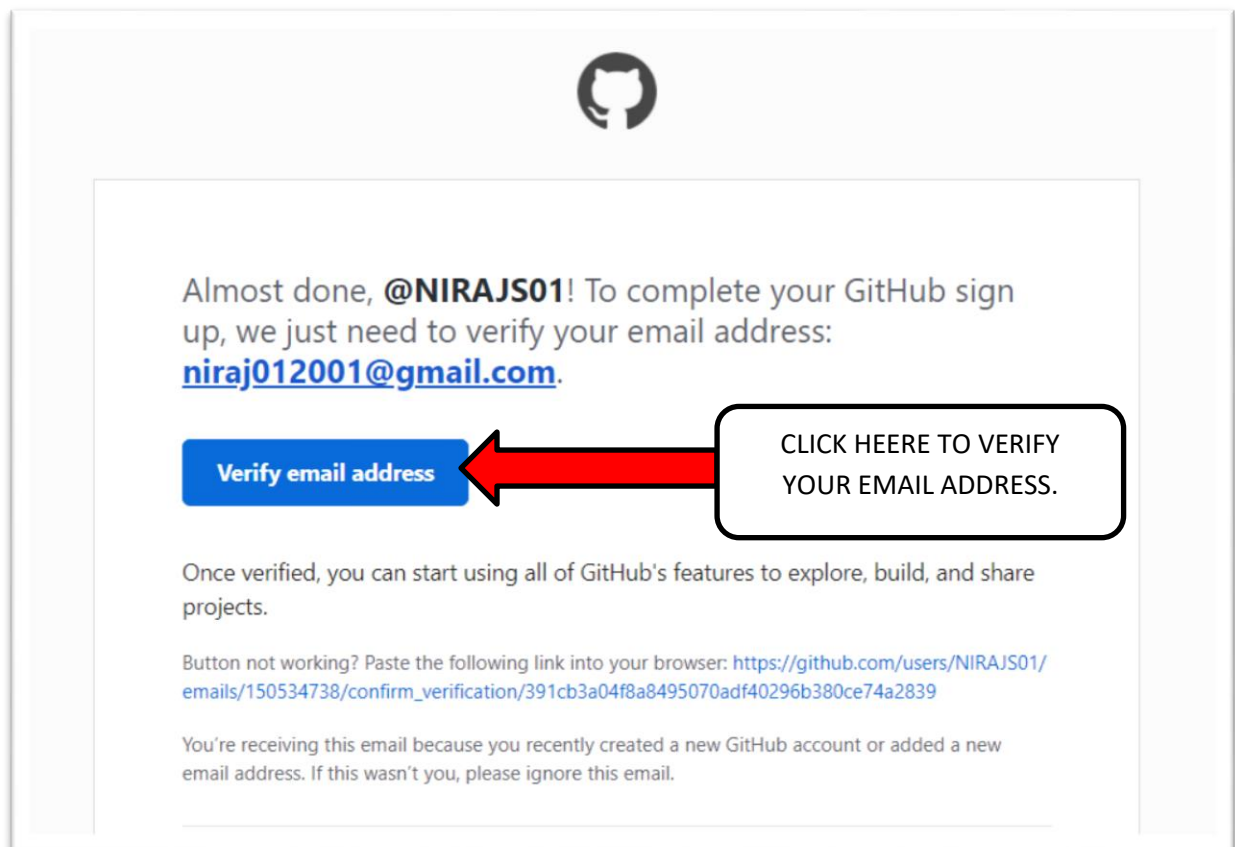

Create account

AFTER ENTERING THE DETAILS, CLICK
ON CREATE ACCOUNT.

✓ STEP 3 : After clicking on the create account you will receive a mail on your email account which you have entered while the creating account for verification. Now you have to just click on the mail and then enter the username and password after completing the account will be verified.

IN CASE IF YOU HAVEN'T RECEIVED ANY
VERIFICATION LINK THEN ONLY CLICK ON THIS
OPTION.

✓ STEP 4 : After verification you will see github welcome page with some options you can select according to your preference or you can just click on complete setup.

Welcome to GitHub

Woohoo! You've joined millions of developers who are doing their best work on GitHub. Tell us what you're interested in. We'll help you get there.

What kind of work do you do, mainly?

Software Engineer I write code	Student I go to school
Product Manager I write specs	UX & Design I draw interfaces
Data & Analytics I write queries	Marketing & Sales I look at charts
Teacher I educate people	Other I do my own thing

How much programming experience do you have?

None I don't program at all	A little I'm new to programming
A moderate amount I'm somewhat experienced	A lot I'm very experienced

What do you plan to use GitHub for?
(Select up to 3)

 Learn to code	 Learn Git and GitHub	 Host a project (repository)
 Create a website with GitHub Pages	 Collaborating with my team	 Find and contribute to open source
 School work and student projects	 Use the GitHub API	 Other

I am interested in:

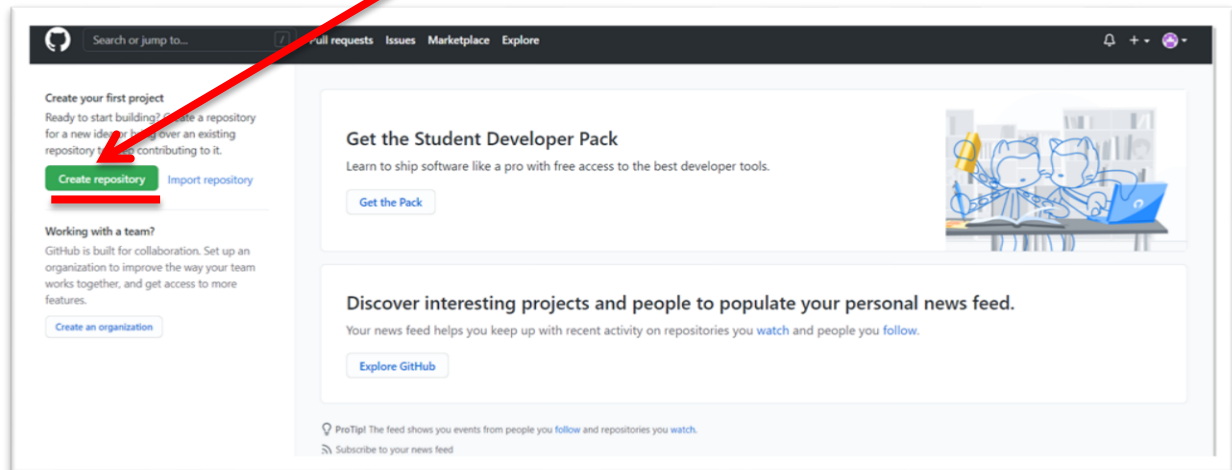

We'll connect you with communities and projects that fit your interests.
For example: `purescript` `gk` `aws`

Complete setup

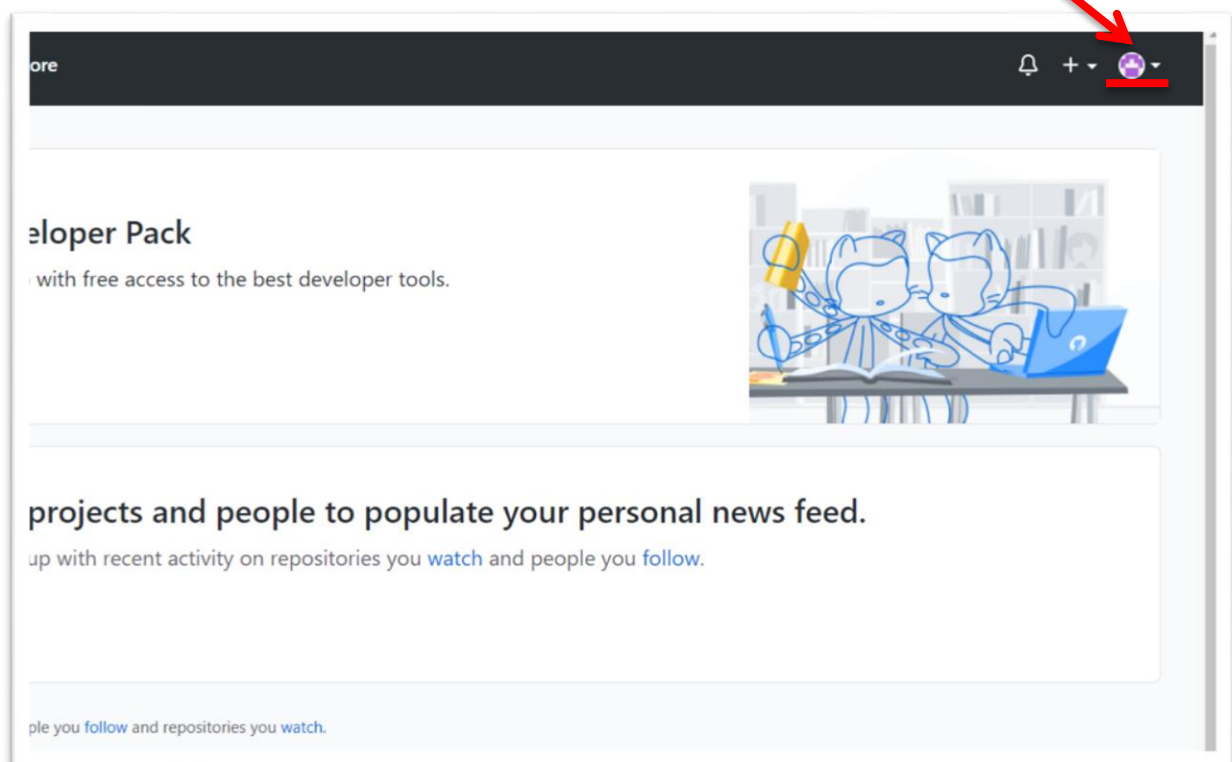

AFTER
SELECTING THE
PREFERENCES.
CLICK ON
"COMPLETE
SETUP".

2) Creating a Repository:

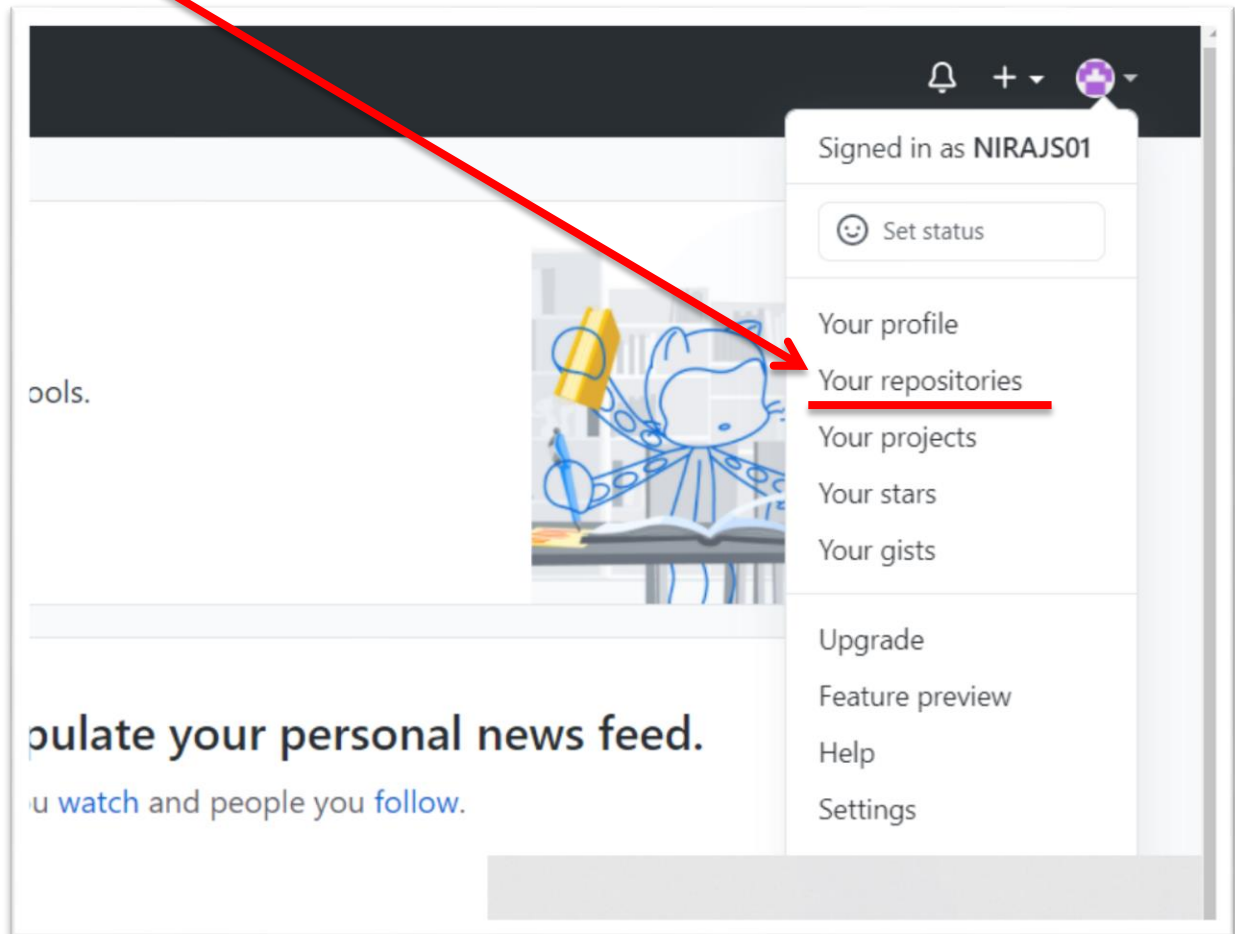

✓ STEP 1: To create a repository click on create repository option on the github page.

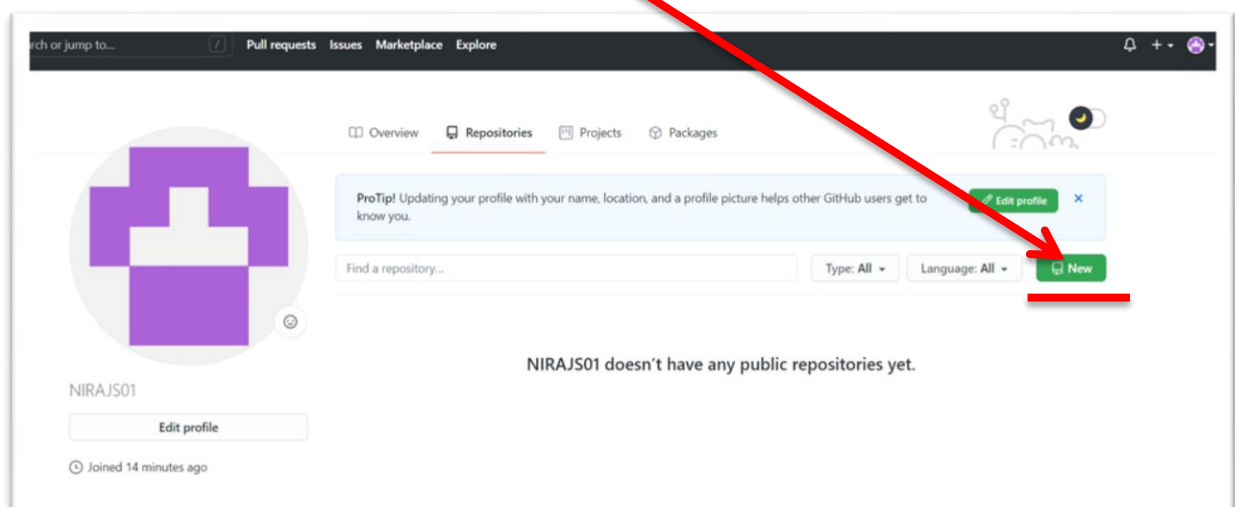

In case if you can't find the option to create repository, then click on Username.

After clicking on username it will open your profile page then click on “your repository”.

To create a new repository click on “NEW”.

✓ STEP 2 : Enter repository name and description. Also you will have to choose the option between PUBLIC (by selecting this option your repository will be visible to everyone) and PRIVATE (by selecting this option your repository will not be visible to others). And you can also add a readme file, gitignore and license. after selecting option according to your choice click on “Create Repository Option”.

Create a new repository
A repository contains all project files, including the revision history. Already have a project repository elsewhere?
[Import a repository.](#)

Owner * / Repository name *

Great repository names are short, unique, and don't contain spaces. Your new repository will be created as test-repository. About silver-enigma?

Description (optional)

☒ **Public**
Anyone on the internet can see this repository. You choose who can commit.

☐ **Private**
You choose who can see and commit to this repository.

Initialize this repository with:
Skip this step if you're importing an existing repository.

☒ **Add a README file**
This is where you can write a long description for your project. [Learn more.](#)

☐ **Add .gitignore**
Choose which files not to track from a list of templates. [Learn more.](#)

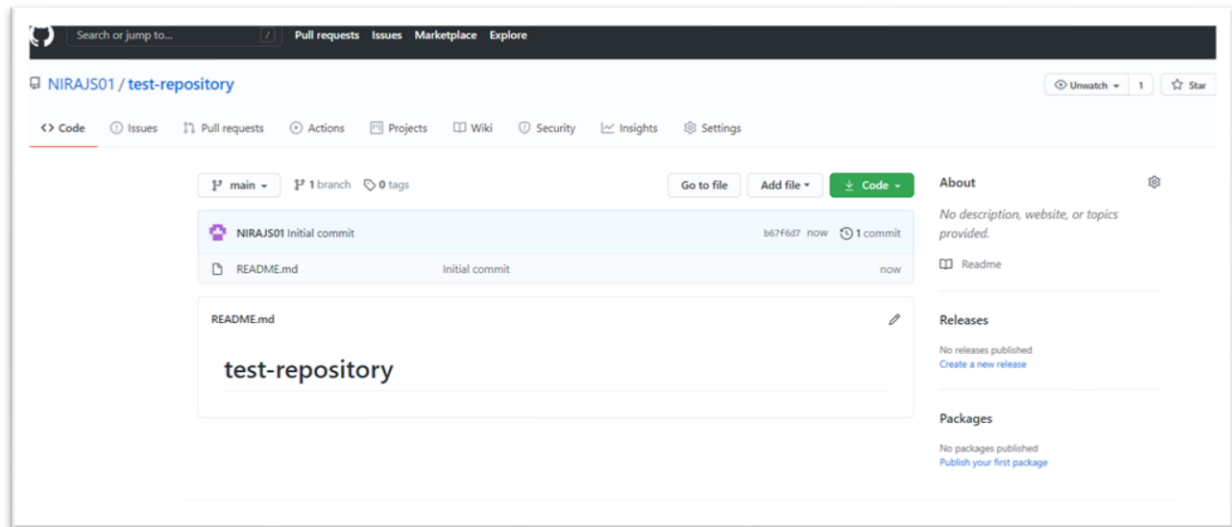

☐ **Choose a license**
A license tells others what they can and can't do with your code. [Learn more.](#)

This will set `main` as the default branch. Change the default name in your [settings](#).

Create repository

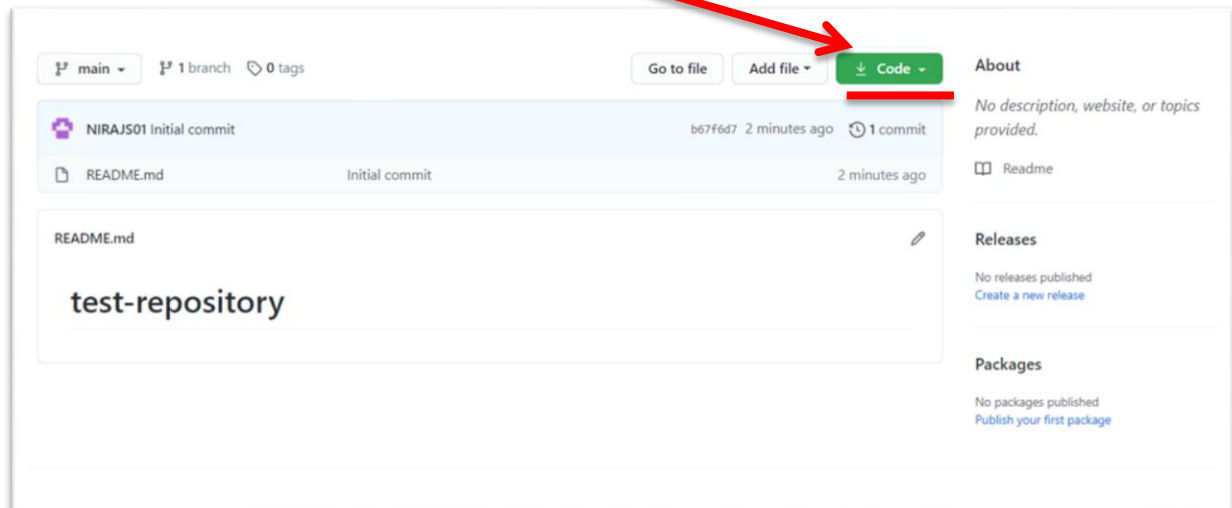

AFTER SELECTING THE DETAILS.
CLICK ON “CREATE
REPOSITORY”.

Now, The New Repository is successfully created.

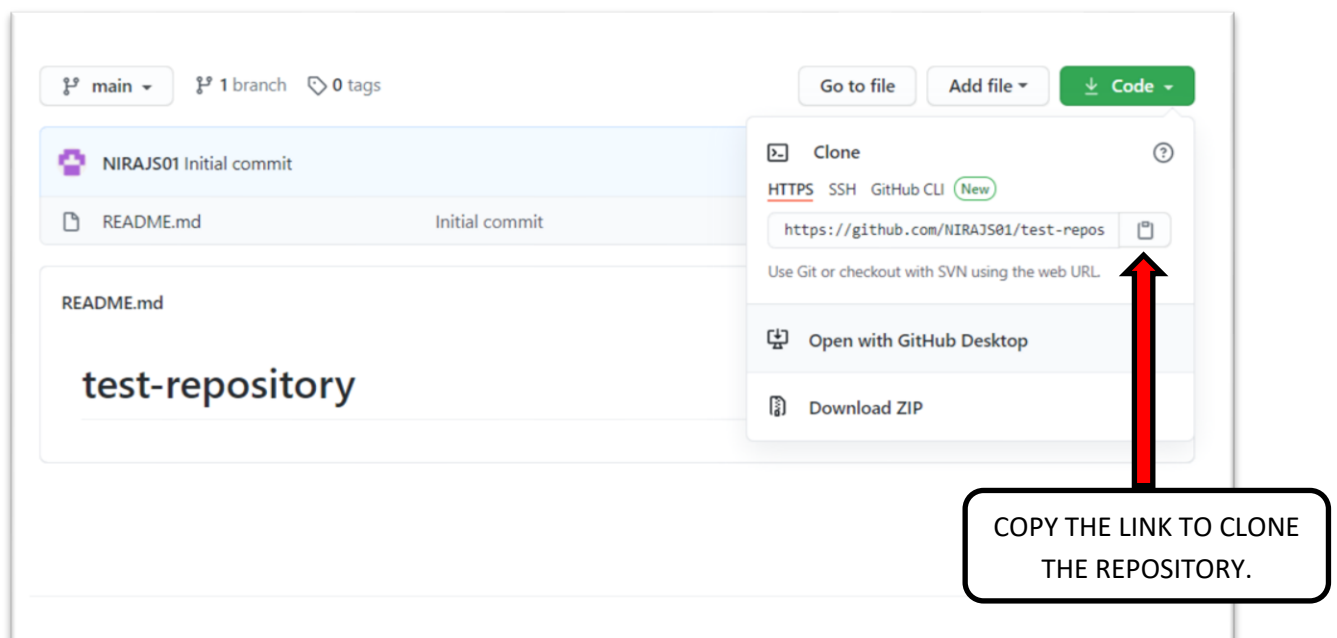

3) Cloning a Repository:

✓ STEP 1: Click on the option "CODE".

✓ STEP 2 : Copy the link of the Repository.

Now, The repository has been cloned.
